PROFESSIONAL SUMMARY

Frontend and Full Stack Developer with hands-on experience building and deploying 4 responsive web applications using React, JavaScript, Node.js, Express.js, and MongoDB. Completed the Noble Desktop Full Stack Web Development Program covering frontend development, RESTful API design, database architecture, and full stack workflows. Proficient in Redux Toolkit, Tailwind CSS, React Router, JWT Authentication, Stripe payment integration, Git/GitHub version control, and deploying production applications to Vercel and Render.

TECHNICAL SKILLS

Frontend HTML5, CSS3, Tailwind CSS, JavaScript (ES6+), React, React Router, Redux Toolkit, Context API, Axios

Backend Node.js, Express.js, MongoDB, Mongoose, REST APIs, JWT Authentication, Stripe, Multer, Cloudinary

Tools Git, GitHub, Vercel, Render, Postman, VS Code, Figma

PROJECTS

BiteRush — Full Stack Food Delivery Platform

React, Node.js, Express.js, MongoDB, Stripe, JWT, Tailwind CSS, Claude AI

- Built 3-tier full-stack application (React frontend, REST API backend, admin dashboard) with JWT-based user authentication.
- Developed 10+ RESTful API endpoints managing users, menu items, orders, and cart operations.
- Integrated Stripe payment processing enabling secure end-to-end checkout flow.
- Built admin dashboard with full CRUD operations for managing products and orders in real time.
- Integrated Claude AI API to power an in-app food assistant with personalized menu recommendations.
- Deployed frontend on Vercel and Node.js/Express backend on Render with environment-based configuration.

PlayHop — Gaming Platform

React, Redux Toolkit, RAWG API, Tailwind CSS

- Built responsive gaming platform with search, filtering, and watchlist — integrating RAWG API with access to 500,000+ games.
- Implemented Redux Toolkit for global state management across 5+ reusable React components.
- Used Axios for API requests and Tailwind CSS for fully responsive UI across all screen sizes.

MiniShop — E-Commerce App

React, Context API, React Router, Tailwind CSS

- Developed e-commerce application with shopping cart, product filtering, and search across 20+ product items.
- Implemented multi-page routing with React Router and Context API for application-wide state management.
- Built responsive product pages and reusable UI components with Tailwind CSS.

Anime Platform

React, REST API, Tailwind CSS

- Built anime discovery application integrating external REST API to display 1,000+ anime titles with search and filtering.
- Created responsive detail pages and reusable card components with React.
